”

In a word being an entrepreneur in my sense means: A life sentence. But I mean it in the exact opposite way – that is to say, being able to decide freely all lifelong and thereby bringing my entrepreneurial ideas to life. That began in my youthful years with the foundation of my very first company and is set to accompany me through to old age. As it happens, I'm anything but a typical publisher who is utterly fond of his published titles. Books, for me, are simply products that generate a great deal of enthusiasm and which can be marketed in every possible place. So came our international book business to light a few years ago – certainly not always very conformist, but always a nose length ahead of others. My fellow German from the self-declared land of poets, philosophers and books often found it hard to understand, but never did that obstruct the momentum of my entrepreneurship.

Fully Homomorphic Public-Key Encryption with Three Ciphertexts

I thank for giving me such a great opportunity to publish my fifth book with them. I am really so grateful. In this book I propose fully homomorphic public-key encryption (FHPKE) with the recursive ciphertext. A ciphertext consists of three sub-ciphertexts corresponding to one plaintext.

Generating A Superconductive Culture of Conscience

I have been quite satisfied with Omniscriptum's publication processes. The process has been largely under my personal control. The fact that authors retain their copyrights is a practical approach to modern publishing. It allows authors complete flexibility in the open-source dissemination of their own works while providing global access to their research.

Design and Synthesis of Continuous Time Filters and Oscillators

Book publication broadens the impact range of my thinking. It benefits the readers, students, and myself as the common sense promotes research insight.
